

Full-Automatic Disposable Surgical Mask Production line

Equipment introduction

The manufacturing process includes the uploading filter materials, wrinkles and presses, uploading the nose-bridge clamps, forms of masks, cutting of masks, welding of ear-bands, packaging and other auxiliary processes. Especially suitable for the production of three-layer disposable masks.

Key features

- Suit for producing adult and children mask
- High output up to 100,000 pieces per day
- Integrated intelligent operating system, one-man operation
- Modular design, easy and safe operation, automatic alarm system
- Reliable assembly concept with low maintenance
- Fit for below Mask production
 - 2 layers non-woven mask
 - 3 layers non-woven mask
 - 4 layers activated carbon masks

Key Specifications

CT	70-100 pcs/min
Ultrasonic frequency	20 KHz
Dimension	4850x2860x2200mm
Volt	220V-50/60Hz
Pressure	5-7 Bar
Power	12 Kw
Weight	1600 Kg

Mask dimension

17,5 x9,5 cm (adults)

Main configuration

- Panasonic PLC+ Touch System
- Automatic transfer system
